**Directions:** Take regular letter size envelopes and seal them—3 in all. Cut about an inch from one end from each of them. I usually take the front flap of the cut edge of the envelopes and cut a little moon shape in them so that retrieving the cards inside the envelopes are a little easier. Glue the label cards from this page to the envelopes. You can then paste these envelopes to a lapbook or a sheet of cardstock for notebooks. Cut apart the individual cards from the first two pages and sort them according to whether they are organs, organisms, or systems.
