

Brain Game

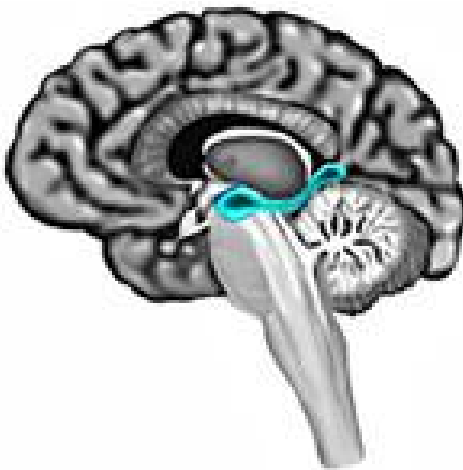

Cerebellum

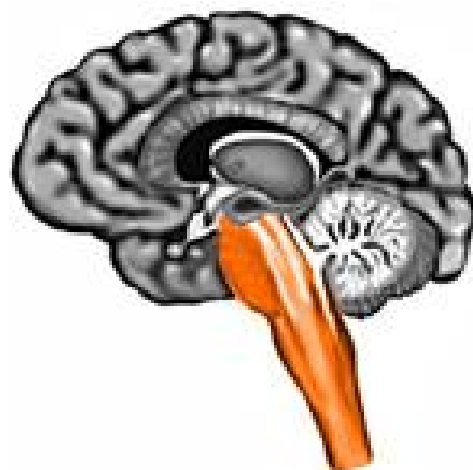

Cerebrum

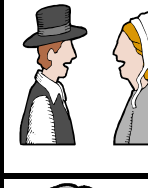

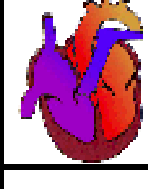

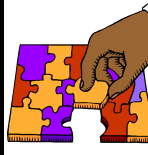

Hypothalamus

Medulla Oblongata

You will need four envelope pockets where you seal up the letter sized envelope and cut off about an inch from one side. You may wish to cut a moon shape out of the front side of the cut edge to make an index cut so that the cards are easier to remove. Cut the pocket pictures on this page out and glue to the front of the pockets you've made. You can now either put these pockets in a lapbook or on a cardstock page for a notebook project. Sort the cards on the next page into the pocket that determines what part of the brain handles which activity.

	Hearing		Touch
	Seeing		Digesting
	Thinking		Walking
	Throwing a Frisbee		Planning
	Smelling		Being frightened
	Soccer		Talking
	Balancing		Remembering
	Angry		Tasting
	Jump Roping		Heartbeat
	Coughing		Problem solving
