Note: This is an alternative assessment project for reading. Students read at least five books under each genre or book type as listed in the contents page. Under each section, the book titles are listed to correspond with the reading notebook log sheets for each book to be included in this notebook. I recommend a binder that is best suited for the student with the contents page in front and the corresponding log sheets in the order mentioned on the contents page to follow. This covers a multitude of reading objectives for all grades, including the reading of different genres, the understanding of book facts, comprehension, and application to own life.
